

U-DEK[®] MARINE DECKING

ABOUT US

U-DEK® by
ULTRALON™

We are foam manufacturers. Our tightly controlled manufacturing processes, using only high quality, non-hazardous raw materials, plus a high level of technical expertise and the latest moulding technology and equipment, place us amongst the most **highly regarded PE and EVA foam manufacturers in the world.**

This approach enables us to offer customers quality, reliability and consistency of product, and makes ours the foam of choice for demanding applications.

ULTRALON™ FOAM

What is it?

Ultralon™ closed cell chemically cross-linked foams are manufactured from polyethylene (PE), ethyl-vinyl-acetate copolymers (EVA) or a high-tech blended copolymer. The fine cell structure gives **minimal water absorption, a high buoyancy rating and excellent chemical resistance.**

Ultralon™ foams are produced in moulded block form and can be trimmed to size and thickness. They are easily processed, using standard foam-processing machinery. No chlorofluorocarbon (CFC) product or derivatives are used, and no organic fillers are added to foams.

Ultralon™ anti-slip, closed-cell foam deck treads offer a **hard wearing, easy to maintain alternative** to moulded in anti-slip or paint-on textures for **traction in wet areas, improving your comfort and safety.** Ultralon™ foams provide protection for boat surfaces, especially in high traffic areas.

U-DEK® Marine Decking on Offer

Designed specifically for marine applications

U-Dek® is a closed cell foam with a high grip brushed surface, that is **non-absorbing and easy to clean.** Because of its lightweight, durable and high grip properties, U-Dek® is **widely used on wake and ski boats, fishing and pleasure boats as well as houseboats, trailers and PWCs.**

U-Dek® anti-skid deck tread offers a stylish, easy to maintain alternative to moulded-in anti-skid or paint-on textures for traction in wet areas; improving comfort and safety.

U-Dek® is supplied with **3M™ marine-grade, pressure-sensitive adhesive backing** for easy peel-and-stick installation.

Available in different styles and colours, U-Dek® can be customised to suit individual styles.

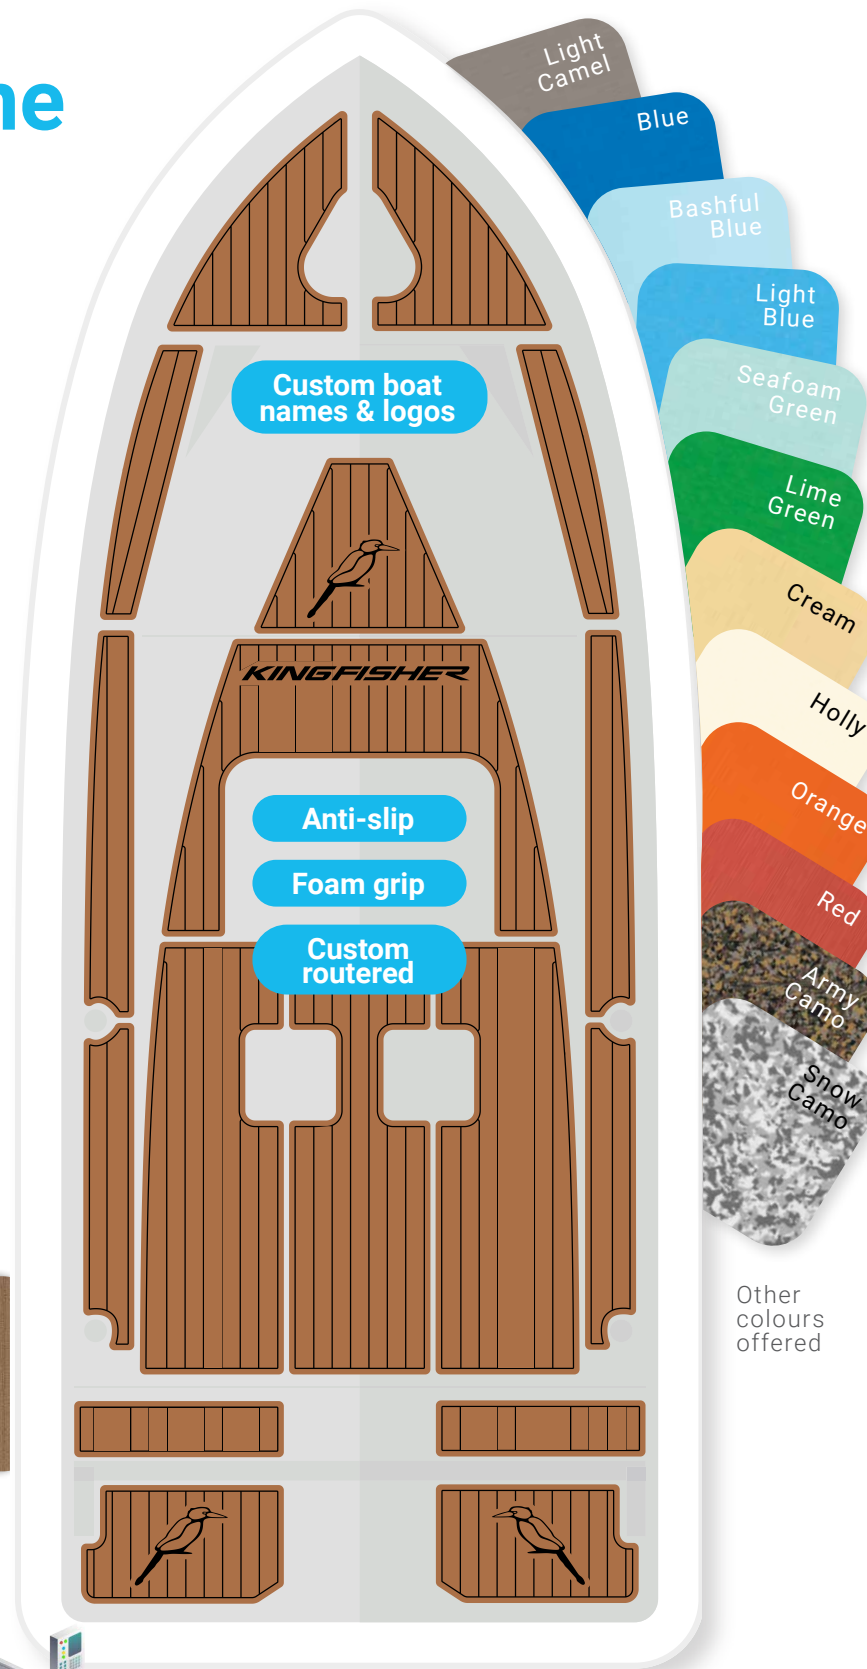

U-DEK® Custom Routered

Offering a traditional teak-look, **without the investment or ongoing maintenance,** U-Dek® Custom Routered provides excellent protection for your boat, whilst looking good and being comfortable under foot. The panels and custom patterns are achieved by **CNC routing the top layer of foam,** exposing the layer underneath, with **bevelled edges** to ensure a high quality finish.

Dual Laminated Standard Colours

Brushed Finish / 2050mm x 1030mm x 6mm

Core Colour Range

These are the core 5 colours that are most popular in our range. The full range includes another 11 colour options including green, blue, white, camo and more. Check out the whole colour range at www.udek.com.au/sheet-foam

U-DEK® Kits

With over 750 of the most popular boat models in our database, it's now even easier to have U-Dek® installed. And if your boat isn't listed, or it's a custom-design, through 3D scanning or templating U-Dek can be designed to any model or design specifications.

U-DEK® Peel & Stick Small Packs

For smaller areas, you can purchase packs of U-Dek® in various sizes, styles and colours, all with 3M™ peel and stick marine-grade adhesive for your own easy installation.

Included in the range are fish rulers, gunwale step strips, non-slip deck strips, step pads and trailer treads in both single and tandem.

Alternatives to the traditional teak offer

U-TREAD™, NANO-DOT™ & SURF GRIP

All U-Dek® products include a 3M™ peel and stick **marine-grade adhesive backing** for easy installation.

Also available, spray-on **U-Dek® Cleaner** – a quick and easy way to keep your deck looking clean and fresh.

Octi Pattern

U-TREAD™

2050mm x 1030mm x 5mm

U-TREAD™ in moulded Octi and Z patterns is a **hard wearing deck tread** suitable for floors, gunwales, trailers and general wet areas, improving safety when out on the water, and increasing the **overall protection** of your boat.

U-TREAD™
OCTI PATTERN

U-TREAD™
Z PATTERN

NANO-DOT™

2050mm x 1030mm x 5mm

This **anti-slip deck tread** with a unique **pressed dot pattern** is, like all Ultralon® decking solutions, durable and easy to maintain. NANO-DOT™ can be laminated with a contrasting base colour foam and routed for a truly custom look.

NANO-DOT™

U-DEK® Surf Grip

U-Dek® Surf Grip features all the same benefits as U-TREAD™ marine decking, with a **narrower pre machined profile** and groove tread pattern making it ideal for **jet skis, boats and surfboards**.
